User Manual Installation XAMPP Server on OS-X

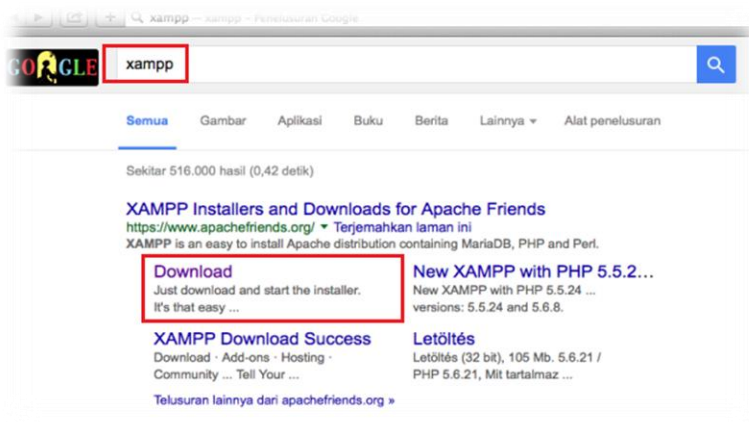

IHSANA

IMA BuildeRz

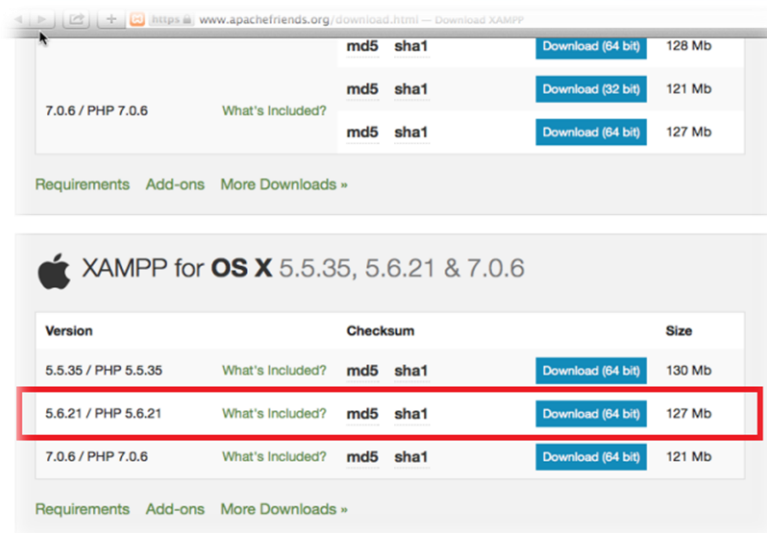

Installation XAMPP Server on OS-X

Installation XAMPP Server

1. Run **Safari** and search **XAMPP**
2. Select **Download** Categories

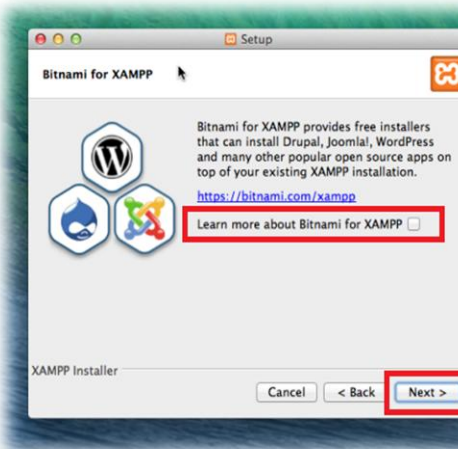

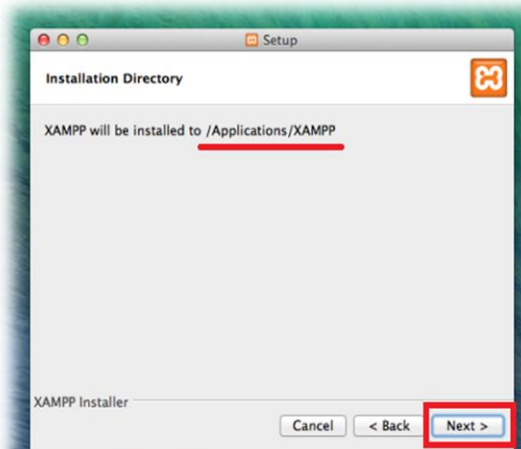

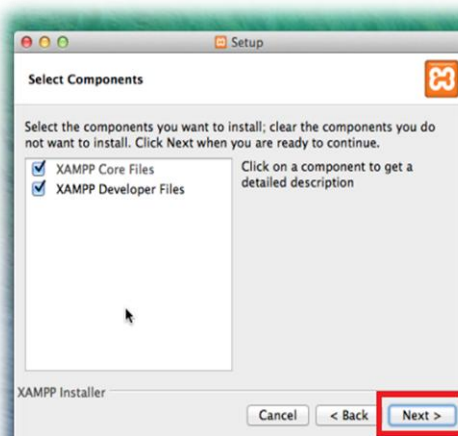

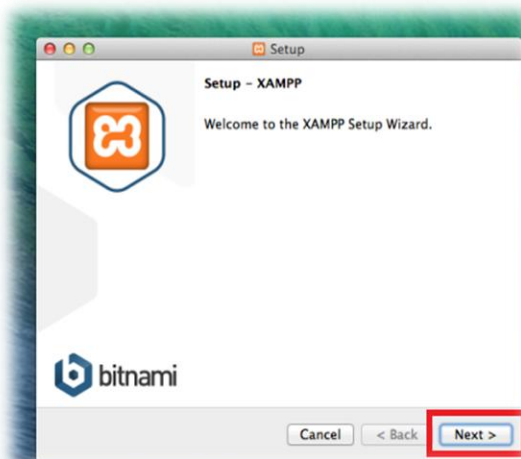

3. Choose **XAMPP for OS X**
4. Then download **5.6.21 / PHP 5.6.21** (recommended using PHP 5.6.x)

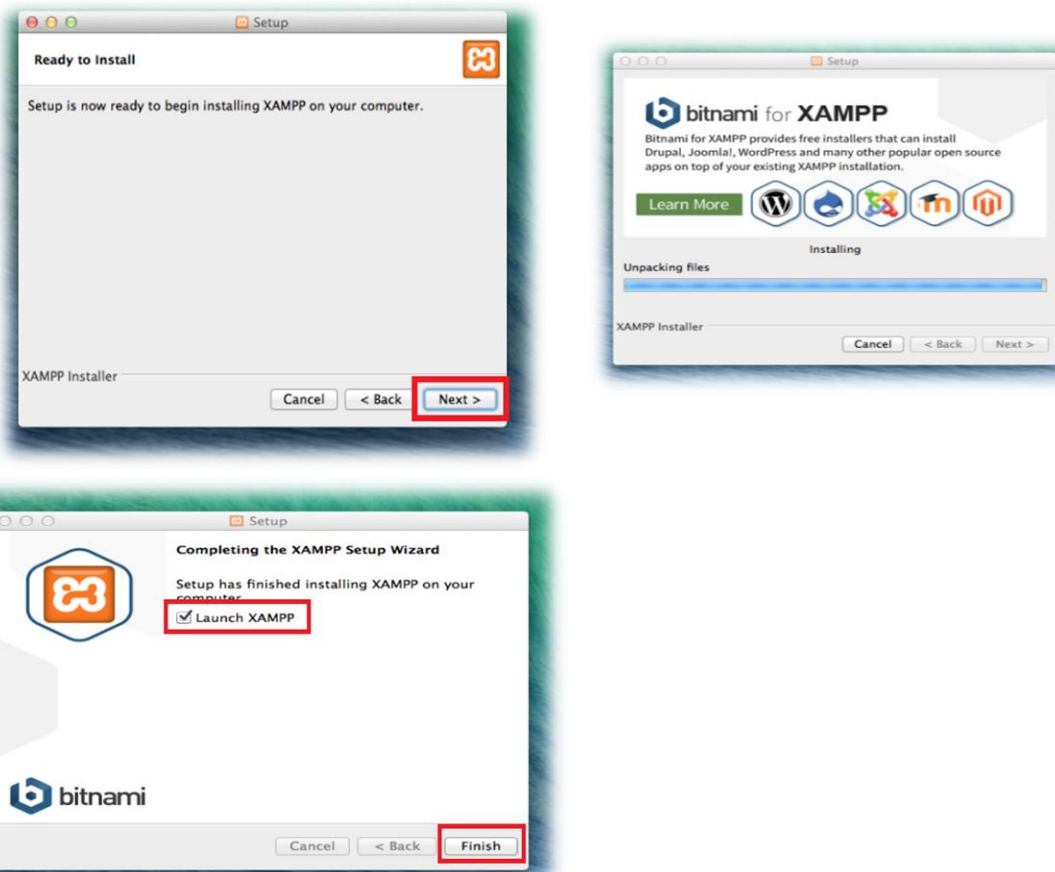

5. After download complete, run **xampp-osx-5.6.21-0-installer.dmg**

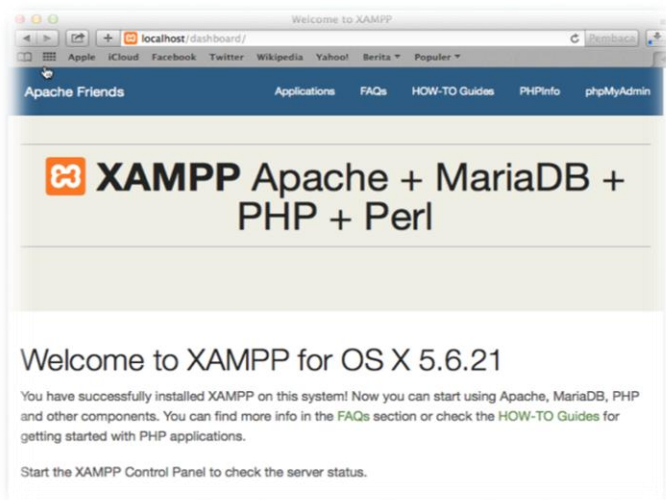

6. Run **Installation**

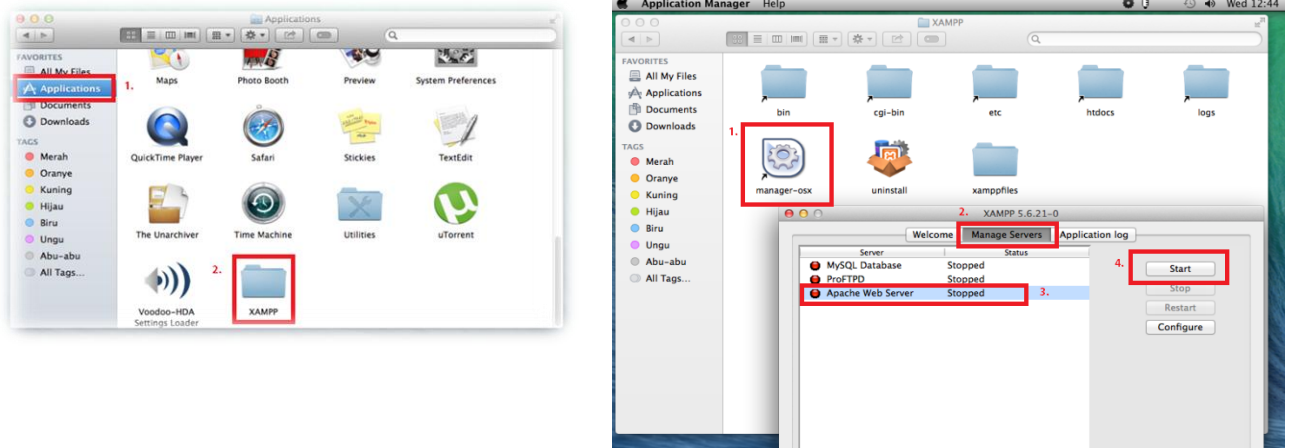

7. Now, back to **safari**, access website <http://localhost>

If you fail access **localhost**, go to next step

Start XAMPP Server

8. Run Finder

9. Click **Applications** then click **XAMPP**

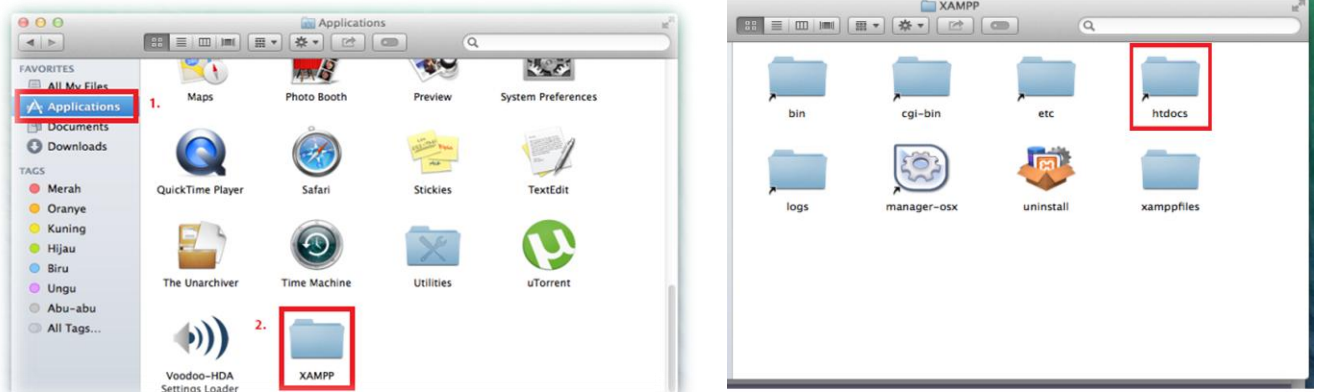

10. Click **manager-osx**, in Tab Manage Servers click **Apache Server**

11. Then Click button **Start**

Installation IMA BuildeRz

12. Download and Unzip/Extract IMA BuildeRz from codecanyon.net

13. Extract file **rev17.xx.xx.zip** and then copy file to **/Applications/XAMPP/htdocs**

When folder in Finder

/Applications/XAMPP/htdocs/**ionic-app-builder**

/Applications/XAMPP/htdocs/**rev17.10.04**

/Applications/XAMPP/htdocs/**rev17.10.10**

You can access site using Safari/Firefox

<http://localhost/ionic-app-builder>

<http://localhost/rev17.10.04>

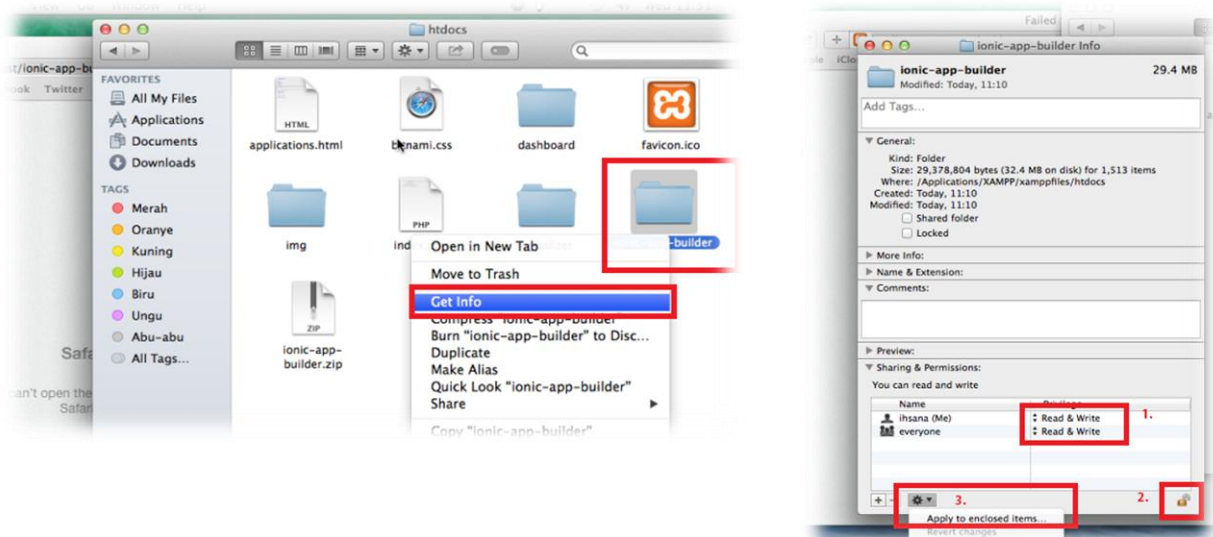

<http://localhost/rev17.10.10>

Changing Permission File and Folder (Not work in all osx version)

14. Now, change permission to **read and write**

15. Right Click **ionic-app-builder** folder

16. Choose **Get Info**

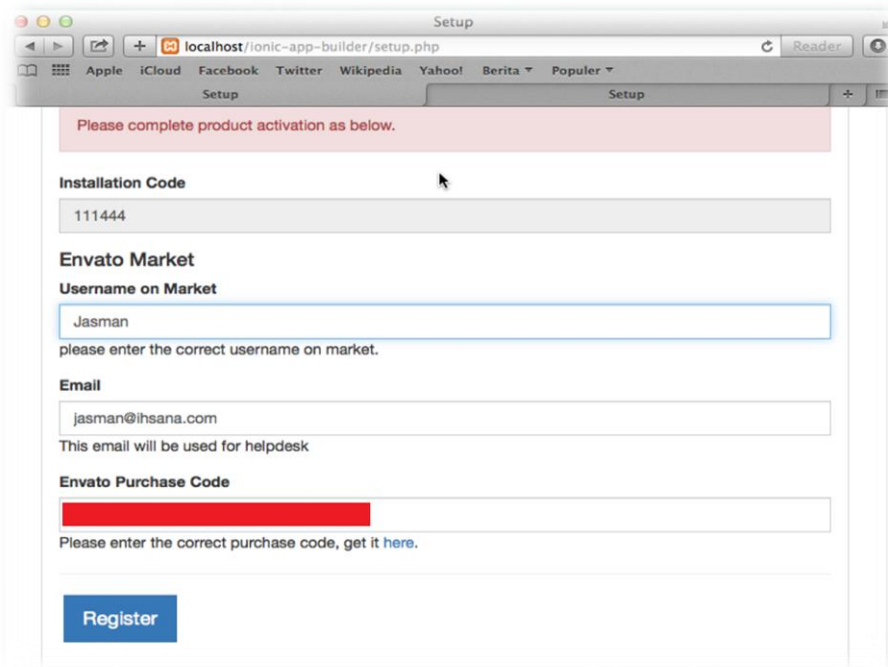

17. Click **unlock** key and enter your password

18. Click for expand **Sharing and Permissions** then **change to Read and Write**

19. Then Click **Apply to enclosed items**, do well for each folder, eg: **projects** and **output** folder.

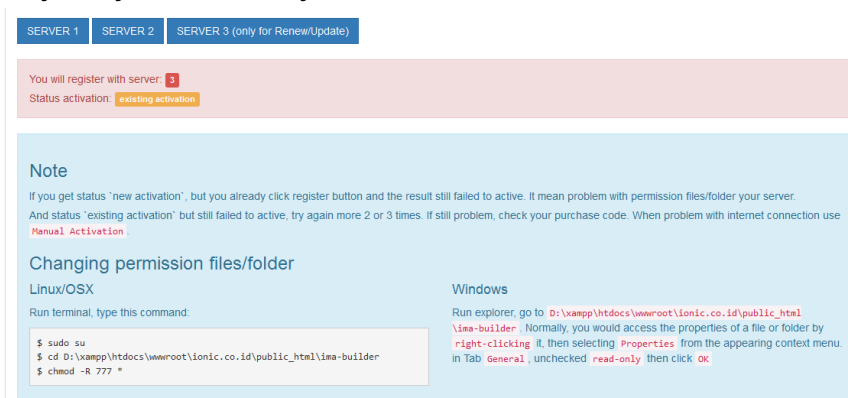

20. Go to Safari, access <http://localhost/ionic-app-builder>
Now, you can register your Products

21. If **styles or color not work properly**, still problem with permission go to next step.
22. If still **redirect to setup.php and username, email, purchase code not saved**, it mean still problem with permission files/folder, go to next step.

Changing Permission File and Folder using Terminal (recommended)

23. Guides also available in setup.php, Go to Safari, access <http://localhost/ionic-app-builder> (maybe style not correctly)

24. Run terminal, then typing with careful:
sudo su
then enter your password
25. Then go to IMA BuildeRz folder
cd /Applications/XAMPP/htdocs/ionic-app-builder/
26. Then changing permission using command:
chmod -R 777 *
27. Go to Safari, access <http://localhost/ionic-app-builder>
Now, you can register your Products

Activation IMA BuildeRz

27. Run browser, access **ionic-app-builder**, will be redirect to **setup.php**
